ABOUT INDIA

The New Growth Engine of the World Economy

- Ranked 5th in the world based on nominal GDP
- Emerging as the 'Post-China' by becoming a new manufacturing hub of the world
- Expected to reach 3rd place in the world economy by 2030, following the United States and China

Abundant Labor Force, Giant Consumer Market

- World's largest nation with a population of 1.4 billion
- Potential with over half of its population under 30 years of age
- Rapidly increasing income levels, with the middle class expected to be over 65% of the total population by 2045

Emerging Nation's Springboard

Geographically positioned as a gateway to extend beyond South Asia to the Middle East and Africa, serving as both a springboard for emerging economies and a strategic hub.

INDIA-KOREA

BILATERAL RELATIONS

India is being recognized as the land of opportunity. The deep-rooted connections between India and the Republic of Korea (ROK) can be traced back to 48 AD.

While these early connections were profound, it was not until 1973 that formal diplomatic relations were established. We recently celebrated the 50th anniversary of this milestone in 2023, the five decades of diplomatic ties between India and the ROK symbolize a vibrant and enduring relationship that encompasses politics, economics, and culture. Moreover, they hold the promise of a brighter and more sustainable future.

India-Republic of Korea Special Strategic Partnership has expanded to diverse areas of cooperation, which include trade, investments, defense, education, S&T, and culture.

INDIA INDUSTRY EXPO CONCURRENT SHOW

**ASIAN
FIRE SAFETY
EXPO** **21-23 NOVEMBER 2024**
YASHOBHOOMI, NEW DELHI

The Centre for Fire Explosive & Environment Safety (CFEES), of DRDO, Ministry of Defence, Government of India, in collaboration with the Confederation of Indian Industry (CII), is organising the Asian Fire Safety Expo (AFSE) 2024, from 21 to 23 November, 2024 at Yashobhoomi, Dwarka, New Delhi, India. AFSE is held as a Concurrent Show at India Industry Expo 2024, where Republic of Korea is participating as Country Partner.

AFSE 2024 is supported by Fire Protection Association of India (FPAI) and Asia Fire Protection Inspection Council (AFIC).

The AFSE 2024 aimed at the following:

- Provide an International Platform to industries to showcase their products and participation in R&D, technology development, test & evaluation and standard formulation in the area of fire safety.

- Organizing an International Technical Seminar on “Latest Trends in Fire Safety and Future Perspectives” and the Compendium with details of technologies, test & evaluation facilities from AFIC countries & details of industries & their products, testing agency etc. will be released.
- Providing a great opportunity for researchers, academicians, industry partners and fire safety experts to exchange information/ideas/problems/solutions, joint collaborations for sustainable development.
- Showcase and cover latest fire safety trends & products, new approaches & challenges in current scenarios, bridging gaps, case studies, and experiences for fire fighting in extreme environments.
